

**The American Institute of Architects Continuing Education System
AIA/CES Registered Provider Program Summary Handout**

Provider: Advanced Equipment Corporation **Provider No.:** J577
Program: *Space Division for Today's Flexible Designs* **Course No.:** AIA-AE Corp-18
Length: 1 hour
Credits: 1 HSW LU

Description: This program takes a look at current space division options on the market, their advantages and disadvantages, and the many Commercial (specifically Corporate, Hospitality, and Education) applications for them. By comparing and contrasting the various options, while demonstrating health, safety, and welfare features, the program aims to equip the decision-maker with valuable and pertinent information.

Learning Objectives:

1. Why Flexible Space is necessary today.
2. The Types and Benefits of space division.
3. Types and descriptions of Sound Control Classes.
4. Overall Safety and Risks of space division solutions.
5. Current Design Trends in space division.

How Taught: The CES facilitator determines in advance the specific learning objectives and the experience level of the audience. Using a screen presentation, the facilitator discusses the issues of interest and concern to the participants by showing relevant portions of the program. Feedback will be obtained by asking questions and posing situations to the group.

AV Needed: Electrical power and screen for presentation. Facilitator provides laptop and or flash drive for use in on site computer.

Target Audience: Architects, interior designers, specifiers, owners, facility managers, building operators, and other design professionals in the commercial market. Ideal audience size is 10-40. The experience level of the audience will be assessed ahead of time so the facilitator can accommodate his/her remarks to meet the audience's needs.

Facilitator Qualifications: All Advanced Equipment Corp or AEC distributor CES facilitators receive formal training on CES guidelines and presentation skills and are certified by Advanced Equipment Corp to give this program.
